ABSTRACT

This bibliography reviews approximately 70 reference materials on criminal justice. Entries are presented in eight categories--dictionaries, indexes and abstracts, professional position papers, working conditions and unions, law and the police, crime, prisons and prisoners, and victimization. Types of publications included under the subject headings include tables, newsletters, periodicals, case studies, agency reports, summaries of articles of interest, and statistical analyses. For each entry, information is presented on author, title, abstract, date of publication (or beginning date, if the entry represents a series), country of origin, and complete reference citation at the library of the California State University, Sacramento. Most of the material was published during the 1970s, although several of the dictionaries date from the 1940s. (DB)
